

Smart medical ball V2

PROBLEM Difficulty tracking strength and rehabilitation progress objectively Patients lose motivation without visible proof of progress between sessions Coaches/Physiotherapist can't monitor movement and adherence over time or compare progress across different exercises or sessions EXISTING ALTERNATIVES	SOLUTION Proprietary sensor/impact tracking capturing acceleration, distance, and impact during exercises Automatic repetition tracking without manual logging App/phone-based tracking of progression data and performance metrics across exercises or sessions KEY METRICS Reps completed per session Impact force per throw/catch Distance/trajectory per rep Session frequency & adherence to prescribed program Progress trend over time	UNIQUE VALUE PROPOSITION A smart medical ball that automatically captures detailed movement and performance metrics (reps, acceleration, distance, impact) to objectively track rehabilitation and strength training progress over time. HIGH LEVEL CONCEPT	UNFAIR ADVANTAGE Patent on the impact-detection/held-vs-dropped method, if novel; clinical validation studies (unproven) CHANNELS Own web shop (direct-to-consumer online sales) Established resellers (retail/distribution partners)	CUSTOMER SEGMENTS People undergoing rehabilitation People doing strength training Coaches/Physiotherapists who recommend the product Gyms, sports clubs and rehabilitation centers EARLY ADOPTERS
COST STRUCTURE Hardware manufacturing (sensors, casing, materials) R&D / engineering (sensor calibration, firmware) Gym 150 units Hardware & Components: 52 500 - 75 000 kr (350-500kr/pp) Construction & production: 5000 - 22500 (100-150 kr/pp) Rehabilitation centers 50 units Hardware & Components: ~17 500 - 25 000 kr (350-500kr/pp) Construction & production: ~5000 - 7500 (100-150 kr/pp) B2C 300 units Hardware & Components: ~120 000 - 180 000kr (350-500kr/pp) Construction & production: ~30 000 - 45 000 (100-150 kr/pp) Total cost 500 units R&D ,firmware & app development: ~60 000- 100 000kr		REVENUE STREAMS Subscription for advanced data and app features One-time hardware purchase (medical ball with basic functions) B2B clinic/gym licensing (per-seat/per-location dashboard fee) One- Time hardware purchase (medical ball with basic functions): B2C (300 units): 1 200 - 1 800 kr/st (Total: 360 000 - 540 000 kr) Gym (150 enheter): ~1 500 - 2 200 kr/st (Total: 225 000 - 330 000 kr) Subscription for advanced data and app features (B2C / Avancerad licens): Price model: ~49 - 99 kr/month per user for training programs, deeper graphs och history. Roughly income (with aprox. 20% of customers subscribing = 60 subscribers): ~3 000 - 6 000 kr/month. B2B clinic/gym licensing (per -seat/per location dashboard fee): Price model: ~499 - 1499 kr/month per clinic/gym Roughly income (with 15 gyms and 5 rehab centers): ~10 000 - 30 000kr/month
